Company logo

Established in 1965, Lubi Valve is a leading industrial valve manufacturer, delivering high-performance flow control solutions for industries like oil & gas, water treatment, power plants, chemical processing, and manufacturing. As a proud Make in India company, we design and manufacture precision-engineered valves that meet the highest global standards.

We offer a comprehensive range of industrial valves, including gate valves, butterfly valve, ball valve, globe valve, check valves, dual plate check valve, brass ball valve, brass nrv, globe steam stop valve, lift check valve, swing check valve, suction diffusers, triple duty valves, y-strainer, all designed for durability, efficiency, and long-term reliability. Our advanced manufacturing processes, stringent quality control, and cutting-edge technology ensure that every valve we produce meets the demands of high-pressure and corrosive environments.

Our state-of-the-art manufacturing facilities are certified with ISO 9001, ISO 14001 and ISO 45001, ensuring superior product quality, environmental responsibility, and safety. We are also IBR Approved, reinforcing our commitment to excellence in industrial valve manufacturing. Additionally, we are in the process of certifying our products as per ISI, IBR, UL/FM, and API standards to further enhance our global credibility.

At Lubi Valves, we prioritize innovation, customer satisfaction, and seamless operations. Explore our wide range of industrial valves today at www.lubivalves.com and experience unmatched reliability!
