The **Milk Analyzer** by Everest Instruments Pvt. Ltd. is a compact, accurate device designed to quickly measure key milk parameters like fat, SNF, protein, density, temperature, and added water. Ideal for dairy farms and milk collection centers, it ensures transparency and fairness in milk procurement. With advanced sensor technology and a user-friendly interface, it delivers reliable results in seconds. Durable and easy to maintain, it reflects Everest’s commitment to quality and innovation in the dairy industry.
