ProTec Friction Group is a leading innovator in friction technology, providing high-performance materials, brake systems, and motion control solutions for automotive, industrial, and robotic applications. Our expertise spans across brake pads, clutches, industrial brakes, and customized friction components engineered for precision, safety, and reliability. With decades of experience, we combine advanced materials science with modern manufacturing techniques to deliver products that meet global OEM and aftermarket standards. ProTec Friction Group serves industries such as automotive manufacturing, heavy equipment, robotics, and aerospace — ensuring superior performance under extreme conditions. We pride ourselves on quality, innovation, and technical excellence, helping our clients reduce wear, improve efficiency, and optimize system performance. Whether you need automotive friction parts, industrial brake materials, or custom-engineered solutions, ProTec Friction Group is your trusted partner in motion and control technology.
