Building Envelope Solutions provides expert commercial building consulting across San Antonio and the Austin Texas region, specializing in Roof Consulting, Building Envelope & Enclosure Consulting, Parking Lot Consulting, and full forensic building investigations. As ABAA Certified Air Barrier Specialists and COSA Special EIFS Inspectors, our team delivers trusted third-party verification to ensure your building is constructed—and repaired—the right way.

We diagnose and resolve complex water penetration issues, structural concerns, and exterior envelope failures. Our consulting services include guidance and oversight for roofing systems, air barriers, wall waterproofing, EIFS, and below-grade waterproofing to protect your building from long-term damage.

From forensic assessments to construction oversight, we combine building science expertise with practical field experience to help owners, architects, and contractors prevent failures and restore performance. If you need a reliable partner who understands the entire building envelope, trust Building Envelope Solutions to safeguard your commercial property.
