We are an outpatient rehabilitation center staffed with chiropractors, massage therapists, and registered chiropractic assistants.

We believe that during rehabilitation, the patient should be educated by their doctor in order to be able to maintain maximum flexibility and pain-free living long after our work ends.

Our doctors and therapists have successfully worked with all types of injuries and we work on patients of any age. We have specialized programs for post-surgical rehabilitation, headaches, neck pain, lower back pain, athletics as well as pregnancy.
