Since 2022, we’ve been one of the first companies to bring professional drone cleaning to New York. Our work covers everything from window washing and building facades to infrastructure cleaning at scale. Over time, we’ve expanded to service the entire East Coast, working with clients that range from hospitals and apartment buildings to university campuses, Fortune 500 headquarters, and some of the largest energy companies in the U.S. With a 100% client satisfaction record, we deliver experience and results that newer operators simply can’t match.
