Company logo

SSP India, operated by Shreeji Engineering, is a manufacturer and supplier of solar panel mounting structures and accessories based in Vatva GIDC, Ahmedabad, Gujarat.

The company offers mounting solutions for rooftop solar systems, industrial sheds, tin roofs, asbestos roofs and ground-mounted solar projects. Its product range includes aluminium mounting rails, middle clamps, end clamps, strut channels, roof clamps, hanger clamps, spring nuts, base plates, cantilever arms and customized solar mounting components.

SSP India serves solar installers, EPC companies, distributors and industrial project buyers across Ahmedabad, Gujarat, other parts of India and selected international markets. Product dimensions and configurations can be reviewed according to panel size, roof type, installation layout and project requirements.
