Company logo

Baby & Kids Furniture Warehouse is a Toronto-based nursery and children’s furniture retailer serving families in North York, across the Greater Toronto Area and throughout Canada. Open since 1995, the store specializes in helping parents create comfortable, practical and thoughtfully furnished spaces for babies, toddlers and growing children.

Families can visit the company’s 10,000 sq ft North York showroom to explore nursery and children’s furniture in person. The showroom gives parents an opportunity to see furniture styles, finishes and room combinations together before deciding what best suits their home and family. For customers who cannot visit the showroom, Baby & Kids Furniture Warehouse also offers virtual consultations and an online shopping experience with Canada-wide delivery.

The product selection covers many of the essentials families need when preparing a nursery or updating a child’s bedroom. Categories include standard and convertible cribs, coordinated nursery furniture sets, dressers and nursery storage, bedding, gliders and recliners, as well as beds, tables, chairs and other furniture designed for older children. Parents can shop individual pieces or explore coordinated furniture options for a more complete nursery or bedroom setup.

With decades of experience focused specifically on baby and children’s furniture, the business is designed around the practical questions families face when furnishing a nursery. Customers can compare different crib styles, storage options, gliders and coordinated sets while considering factors such as available space, furniture configuration, appearance and how a room may need to change as a child grows.

Baby & Kids Furniture Warehouse combines the advantages of a physical Toronto-area furniture showroom with the convenience of online shopping. Local families can browse products in person in North York, while customers elsewhere in Ontario and across Canada can explore the collection online and arrange eligible products for Canada-wide delivery. Virtual appointments also provide another option for families who would like guidance without travelling to the showroom.

Whether a family is preparing a first nursery, adding storage and seating to an existing room or furnishing a bedroom for a growing child, Baby & Kids Furniture Warehouse offers a focused selection of nursery and kids furniture backed by experience serving Canadian families since 1995.
