PVC Floor Tile is a South African manufacturer and supplier of durable PVC floor tiles, interlocking flooring, plastic flooring and floor mats for residential, commercial, industrial and educational environments. With extensive experience in PVC and rubber flooring, we provide practical, cost-effective and easy-to-maintain flooring solutions designed for demanding spaces.

Our range includes interlocking PVC tiles, garage flooring, workshop flooring, warehouse and factory flooring, commercial flooring, gym flooring and specialised mats. Our modular flooring systems are designed for easy installation, with many products requiring no adhesive, making them suitable for both professional and DIY applications.

Manufactured using recycled materials where applicable, our flooring solutions offer durability, water resistance, easy maintenance and the flexibility to replace individual tiles when required. We supply flooring solutions across South Africa and support projects of all sizes, from home garages and workshops to large commercial and industrial facilities.

PVC Floor Tile combines quality manufacturing, practical design and customer-focused service to help customers choose the right flooring solution for their specific environment and requirements.
