Hello World**!**

I'm working @ Mapolist as a moderator and data traffic analyst.
Under my team's control are 16 business categories and 2947 subcategories. At the beginning of 2025, there are about 3.4 million companies in our database.

 I believe the future of trust is digital.

I work on bridging the virtual and physical worlds by creating secure digital identities that can’t be faked or manipulated.

 Through NFC technology, blockchain, and smart contracts, I help people and companies turn their identity into a valuable digital asset — one that works across e-commerce, finance, and the wider internet.

 Mission**:** To make every profile, every company, every human able to create, manage, and grow their own trusted digital presence.

Respect each other and keep smiling**!**
